Clay	31	132
sand	20	152

Information upon completion of well:

(1) Diameter 2 inches.

(2) Total Depth 152 feet.

(3) Water Level 3 feet below top of ground.

(4) Cased to 147, Size 2"

(5) Screen: Size 2", Length 5'

(6) Were any formations sealed against pollution?  
 \_\_\_\_\_ yes,  no.

If YES depth of formation \_\_\_\_\_

Why \_\_\_\_\_

Drillers Remarks: \_\_\_\_\_

Well No.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions.

2. It is essential to ensure that all data is entered correctly and that the system is regularly updated.

3. The second part of the document outlines the various methods used to collect and analyze data.

4. These methods include surveys, interviews, and focus groups, each with its own strengths and weaknesses.

5. The third part of the document describes the different types of data that can be collected and how they are used.

6. This includes primary data, which is collected directly from the source, and secondary data, which is collected from existing sources.

7. The fourth part of the document discusses the various techniques used to analyze data and how they are applied.

8. These techniques include statistical analysis, content analysis, and grounded theory, among others.

9. The fifth part of the document describes the different types of data visualization and how they are used to present data.

10. This includes bar charts, line graphs, and pie charts, each with its own advantages and disadvantages.
