MISSISSIPPI BOARD OF WATER COMMISSIONERS

WATER WELL DRILLERS LOG

~~CODED~~

Date: 4-23, 1965, Driller: Sutter Wood Works County Harrison
(Name)

- (1) Owner of Land: Alden Keel
(Name)
Pass Christian
(Address)
- (2) Location: Nw 1/4, Sw 1/4, Sec. 8 T8S R12W
1 miles S of Cuevas
(distance) (direction) (Nearest Town)
- (3) Topography: flat
(Hilly) (Flat) (Level)
- (4) Purpose of Well: domestic
(Domestic Irrigation
Municipal, Industrial, Other)

Description & Color of Materials Sand, Clay, Red Clay, Shell, etc.	Thick- ness Feet	Depth Feet
<u>clay</u>	<u>10</u>	<u>10</u>
<u>sand</u>	<u>25</u>	<u>35</u>
<u>Clay - sand streaks</u>	<u>343</u>	<u>378</u>
<u>clay</u>	<u>26</u>	<u>404</u>
<u>sand</u>	<u>23</u>	<u>427</u>
<u>clay</u>	<u>113</u>	<u>540</u>
<u>sand</u>	<u>40</u>	<u>580</u>

Information upon completion of well:

- (1) Diameter 2 1/2 inches.
- (2) Total Depth 580 feet.
- (3) Water Level 4 feet above below top of ground.
- (4) Cased to all, Size 2 1/2"
- (5) Screen: Size 2", Length 10'
- (6) Were any formations sealed against pollution?
no.

If YES depth of formation _____

Why _____

Drillers Remarks: _____

(Use Back Side)

Well No.

1. The first step in the process of identifying a problem is to recognize that a problem exists. This is often done by comparing current performance with a desired state or goal. For example, a manager might notice that sales are declining or that customer satisfaction is low. Once a problem is identified, the next step is to define it more precisely. This involves determining the scope of the problem, its causes, and its effects. For instance, a manager might define a problem as "a 10% decrease in sales over the last quarter, primarily due to a loss of market share in the competitive market." This definition helps to narrow down the focus of the problem and provides a clear starting point for further investigation.

2. The second step in the process is to gather information about the problem. This involves collecting data and facts that are relevant to the problem. For example, a manager might gather data on sales trends, customer feedback, and market conditions. This information is then analyzed to identify patterns and trends that can help to understand the problem better. For instance, a manager might discover that sales are declining in all markets, but the decline is more severe in the competitive market. This information is then used to identify the causes of the problem. For example, a manager might identify that the loss of market share is due to a combination of factors, including a lack of product differentiation, a weak marketing strategy, and a strong competitor. This information is then used to develop a plan of action to address the problem.

3. The third step in the process is to develop a plan of action to address the problem. This involves identifying the specific actions that need to be taken to solve the problem. For example, a manager might develop a plan to improve product differentiation, strengthen the marketing strategy, and compete more effectively in the competitive market. This plan is then implemented, and the results are monitored to ensure that the problem is being solved. For instance, a manager might track sales trends and customer feedback to see if the plan is having the desired effect. If the problem is not being solved, the plan is revised and implemented again.

4. The fourth step in the process is to evaluate the results of the plan of action. This involves comparing the current performance with the desired state or goal to see if the problem has been solved. For example, a manager might compare current sales trends and customer feedback with the desired state to see if sales have increased and customer satisfaction has improved. If the problem has been solved, the manager can celebrate the success and move on to other tasks. If the problem has not been solved, the manager can identify the reasons why and develop a new plan of action to address the problem. For instance, a manager might discover that the plan is not working because the marketing strategy is still weak, and a new plan is developed to strengthen the marketing strategy.
