PERMIT

TO DIVERT OR WITHDRAW FOR BENEFICIAL USE THE PUBLIC WATERS

This permit is issued to the landowner named below in accordance with the provisions of the Mississippi Water Laws, Mississippi Code Sections 51-3-1, et seq. (1972, as amended), and the regulations and standards as promulgated thereunder. Whether or not specifically named in this permit or in the applications for this permit, anyone using water from the diversion/withdrawal point described below shall do so in compliance with the provisions of this permit. Neither this permit, nor any authority conferred hereby, may be sold, conveyed, encumbered, assigned, or otherwise aliened, for any period of time or under any conditions whatsoever. This permit may not be modified, transferred or revoked without prior action by the Permit Board. Any attempts to modify, transfer or revoke this permit, or to take any other action on this permit, shall be invalid and unenforceable and may result in immediate revocation or suspension of this permit. The holder of this permit shall at all times be responsible for adherence to the terms and conditions of this permit. No agreement between the permit holder and any other party shall affect the obligations and liabilities of the permit holder. Water use under this permit is allowed only when the streamflow, lake level elevation, or static groundwater level (whichever, if any, is applicable) is above the established minimum, pursuant to Mississippi Code Section 51-3-7. Authorization is hereby granted to divert/withdraw water for the beneficial use designated herein, and for no other purpose, subject to the following terms, conditions, and limitations:

1. Coverage under this General Permit shall be valid for five (5) years from the issuance date of coverage specified on the Certificate of Coverage. The Permit Board reserves the right to rescind or cancel this General Permit if such action is necessary to effectively and efficiently manage, protect, and utilize the water resources of Mississippi.
2. The volume of water that may be withdrawn and applied per acre irrigated during any calendar year covered under this General Permit shall be dependent upon the crop being grown and shall be limited as follows:
 - a. Up to 1.5 acre-feet per acre per year may be applied to row crops; and
 - b. Up to 3.0 acre-feet per acre per year may be applied to rice.

Example 1: If a rotation of soybeans and rice is grown on a 100-acre field, the permitted volume of water would be 150 AF/yr for those years when beans are grown and 300 AF/yr for those years when rice is grown. (100 acres of soybeans x 1.5 Af/yr = 150 AF/yr; 100 acres of rice x 3.0 AF/yr = 300 AF/yr).

3. The volume of water that may be withdrawn and applied per acre for aquaculture in any calendar year covered under this General Permit shall be limited as follows:
 - a. Up to 5.0 acre-feet per acre per year for all types of aquaculture (except fingerlings); and
 - b. Up to 7.0 acre-feet per acre per year for raising fingerlings.
4. The volume of water that may be withdrawn and applied per acre for the enhancement of wildlife habitat in any calendar year covered under this General Permit shall be limited to 1.0 acre-feet per acre per year.
5. The permitted volume each year is cumulative depending on all applicable beneficial uses.

Example 2: If rice is grown on a 100-acre field and the same field is later flooded for wildlife enhancement, the permitted volume of water would be 400 AF/yr. (100 acres of rice x 3.0 AF/yr = 300 AF/yr; 100 acres of wildlife enhancement x 1.0 AF/yr = 100 AF/yr; 300 AF/yr + 100 AF/yr = 400 AF/yr, total permitted volume for the year.)

6. The permitted volume of water applied to an assigned acreage for a particular beneficial use or crop type cannot be exceeded whether or not multiple water sources are used. Conjunctive use of available water resources (involving both groundwater and surface water) is encouraged.
