Well No.

1911

The first part of the year was spent in the
 field, collecting specimens and making
 notes on the habits of the various
 birds. The weather was generally
 favorable, though there were a few
 rainy days. The birds were
 very active and many new
 species were discovered. The
 most interesting was a small
 bird with a blue head and
 yellow body. It was found
 in a dense thicket of
 bushes. It was very shy
 and difficult to approach.
 It was finally captured
 by a net. It was
 very tame and allowed
 me to handle it
 without any fear. It
 was a very beautiful
 specimen and I
 was very pleased
 to have it. It was
 the first of its
 kind that I had
 ever seen. It was
 very common in
 the thicket and
 I was very
 lucky to find
 it. It was
 very beautiful
 and I was
 very pleased
 to have it.
