Information upon completion of well:

(1) Diameter 4 inches.

(2) Total Depth 288 feet.

(3) Water Level 106 feet below top of ground.

(4) Cased to 151, Size 4.

(5) Screen: Size \_\_\_\_\_, Length \_\_\_\_\_.

(6) Were any formations sealed against pollution?

\_\_\_\_\_ yes,  no.

If YES depth of formation \_\_\_\_\_

Why \_\_\_\_\_

Drillers Remarks: \_\_\_\_\_

**CODED**

(Use Back Side)

Well No.

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

In the second section, the author outlines the various methods used to collect and analyze the data. This includes both primary and secondary data collection techniques. The primary data was gathered through direct observation and interviews with key personnel. Secondary data was obtained from existing reports and databases.

The third section details the results of the data analysis. It shows a clear trend of increasing activity over the period studied. The data indicates that the most significant changes occurred in the latter half of the year. These findings are supported by statistical analysis and visual representations of the data.

Finally, the document concludes with a series of recommendations based on the findings. It suggests that further research should be conducted to explore the underlying causes of the observed trends. Additionally, it recommends implementing specific measures to address the identified issues and improve overall performance.
