WATER WELL DRILLERS LOG

Herndon-Homan Well & Supply, Inc.

Date: 9-1, 1967, Driller: P. O. Box 42, County Monroe  
(When well drilled) SHANNON, MISSISSIPPI 38801 (Where well is located)

(1) Owner of Land:	Description & Color of Materials	Thick-ness Feet	Depth Feet
Sterling Waddell (Name)	surface sand &		
Prairie Mississippi (Address)	clay	0	20
(2) Location: NE 1/4, NW 1/4, Sec. 18, T15R1E	Blue clay	20	280
2 miles SE of Prairie (distance) (direction) (Nearest Town)	Sand	280	400
Bottom		400	
(3) Topography: flat (Hilly) (Flat) (Level)			
(4) Purpose of Well: Domestic (Domestic Irrigation, Municipal, Industrial, Other)			

Information upon completion of well:

- (1) Diameter 5 inches.
- (2) Total Depth 400 feet.
- (3) Water Level 145' feet below top of ground.
- (4) Cased to 221, Size 54
- (5) Screen: Size NONE, Length \_\_\_\_\_
- (6) Were any formations sealed against pollution?  
 yes,  no.

If YES depth of formation 18

Why surface & sand

Drillers Remarks:

Yield in gpm: 5

Size pump: 1/2 HP Sub.

Type power: electric

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

In the second section, the author outlines the various methods used to collect and analyze the data. This includes both primary and secondary data collection techniques. The primary data was gathered through direct observation and interviews, while secondary data was obtained from existing reports and databases.

The third section provides a detailed description of the data analysis process. This involves identifying trends, patterns, and anomalies within the dataset. Statistical tools and software were used to facilitate this process, ensuring that the results are both accurate and reliable.

Finally, the document concludes with a summary of the findings and their implications. It highlights the key insights gained from the study and offers recommendations for future research and practice. The author notes that while the current study provides valuable information, there are still several areas that require further investigation.
