(6) Were any formations sealed against pollution? _____ yes, _____ no.			
If YES depth of formation _____			
Why _____			
Drillers Remarks: _____			

(Use Back Side)

Well No.

THE HISTORY OF THE UNITED STATES

The history of the United States is a complex and multifaceted story. It begins with the early colonial period, where European settlers established colonies along the Atlantic coast. These colonies were often founded for economic reasons, such as the search for new markets and resources. Over time, the colonies developed a sense of identity and self-governance, leading to the American Revolution. The revolution was a pivotal moment in the nation's history, as it resulted in the birth of a new, independent nation. The new nation was founded on the principles of liberty, justice, and equality, which have guided the country ever since. The history of the United States is a story of growth, change, and resilience. It is a story that continues to shape the world we live in today.
