WATER WELL DRILLERS LOG

Date: 8-26-, 1964, Driller: Sutter Well Works County Pearl River  
(Name)

(1) Owner of Land: La Rou Investment  
(Name)  
Picayune Miss.  
(Address)  
(2) Location: NE 1/4, SW 1/4, Sec. 20 T45R17W  
6 miles W, of McNeill  
(distance) (direction) (Nearest Town)  
(3) Topography: Hilly  
(Hilly) (Flat) (Level)  
(4) Purpose of Well: domestic  
(Domestic Irrigation  
Municipal, Industrial, Other)

Description & Color of Materials Sand, Clay, Red Clay, Shell, etc.	Thick- ness Feet	Depth Feet
<u>Clay - sand streaks</u>	<u>86</u>	<u>86</u>
<u>Clay</u>	<u>61</u>	<u>147</u>
<u>Clay - sand streaks</u>	<u>107</u>	<u>254</u>
<u>Sand - gravel</u>	<u>61</u>	<u>315</u>

Information upon completion of well:

(1) Diameter 4 inches.  
(2) Total Depth 315 feet.  
(3) Water Level 126 feet below top of ground.  
(4) Cased to all, Size 4"  
(5) Screen: Size 4", Length 15'  
(6) Were any formations sealed against pollution?  
no yes,  no.

If YES depth of formation \_\_\_\_\_  
Why \_\_\_\_\_

Drillers Remarks: \_\_\_\_\_

(Use Back Side)

Well No.

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

Furthermore, it is noted that the records should be kept in a secure and accessible format. Regular backups are recommended to prevent data loss in the event of a system failure or disaster.

In addition, the document highlights the need for consistent data entry. Standardized formats and codes should be used throughout the system to avoid confusion and errors. Training for staff on these protocols is essential for successful implementation.

The second part of the document provides a detailed overview of the system's architecture. It describes the various components, including the database, the user interface, and the reporting modules. Each component is explained in terms of its function and how it interacts with the others.

The architecture is designed to be modular and scalable, allowing for future growth and integration with other systems. The database is structured to support complex queries and data analysis, while the user interface is designed to be intuitive and user-friendly.

The reporting module generates comprehensive reports that provide insights into the system's performance and usage. These reports are customizable and can be scheduled to run automatically at regular intervals.

Finally, the document concludes with a summary of the key points and a call to action. It encourages the user to review the documentation carefully and to contact the support team if they have any questions or need further assistance.

We believe that this system will provide a significant improvement in efficiency and accuracy for your organization. Thank you for choosing our solution.
