WATER WELL DRILLERS LOG

CODED

Date: June 17, 1966, Driller: Chester Keene County Pike

(When well drilled)

(Name)

(Where well is located)

(1) Owner of Land:	Description & Color of Materials Sand, Clay, Red Clay, Shell, etc.	Thick- ness Feet	Depth Feet
704. <u>SA. Cuthbertson</u> (Name) <u>Rt. 3, Mapaha</u> (Address)	<u>Red Clay</u>	<u>10</u>	<u>10</u>
(2) Location: <u>1/4, 33 27</u> <u>1/4, Sec. 6 T17</u>	<u>Red sand & gravel</u>	<u>50</u>	<u>60</u>
4' from <u>Mapaha way</u> (distance) (direction) (Nearest Town)	<u>Red gravel & sand</u>	<u>10</u>	<u>70</u>
(3) Topography: <u>Hilly</u> (Hilly) (Flat) (Level)			
(4) Purpose of Well: <u>Damboat</u> (Domestic Irrigation Municipal, Industrial, Other)			

Information upon completion of well:

- (1) Diameter 4 inches.
- (2) Total Depth 70 feet.
- (3) Water Level 46 feet below top of ground.
- (4) Cased to Bottom Size 4
- (5) Screen: Size 4', Length 6'
- (6) Were any formations sealed against pollution?
no.

If YES depth of formation _____

Why _____

Drillers Remarks: well rusty

Yield in gpm: 10

Size pump: 1/2 H.P. - 1/2"

Type power: Electric

The first part of the document discusses the general principles of the proposed system, which is designed to improve the efficiency of the existing process. It is based on the following assumptions:

1. The system should be simple and easy to understand.

2. It should be flexible enough to accommodate changes in the future.

3. The system should be able to handle a large volume of data.

The second part of the document describes the specific details of the system, including the hardware and software components. The hardware consists of a central processing unit, memory, and input/output devices. The software is written in a high-level language and is designed to be portable.

The third part of the document discusses the implementation of the system. It is planned to be implemented in a phased manner, starting with a pilot project. The results of the pilot project will be used to evaluate the system and to make any necessary adjustments.

The fourth part of the document discusses the future work that needs to be done. This includes the development of a more comprehensive system, the implementation of the system in other areas, and the ongoing maintenance and improvement of the system.
