<u>sand & chert</u>	<u>9</u>	<u>39</u>
<u>cherty sand</u>	<u>6</u>	<u>45</u>

Information upon completion of well:

(1) Diameter 2' inches.

(2) Total Depth 45' feet.

(3) Water Level 21' feet below top of ground.

(4) Cased to 37 1/2', Size 2"

(5) Screen: Size 1 1/4", Length 5'
Johnson S.S.

(6) Were any formations sealed against pollution?
no

If YES depth of formation _____

Why _____

Drillers Remarks: _____

(Use Back Side)

Well No.

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be clearly documented, including the date, amount, and purpose of the transaction. This ensures transparency and allows for easy reconciliation of accounts.

In the second section, the author outlines the various methods used to collect and analyze data. This includes direct observation, interviews, and the use of specialized software tools. Each method is described in detail, highlighting its strengths and potential limitations.

The third section focuses on the results of the study. It presents a series of tables and graphs that illustrate the key findings. The data shows a clear trend of increasing activity over the period studied, which is attributed to several factors discussed in the text.

Finally, the document concludes with a series of recommendations for future research and practical applications. It suggests that further studies should be conducted to explore the underlying causes of the observed trends and to develop more effective strategies for managing the data.
