	<u>Medium Gray Sand</u>	<u>70</u>	<u>1770</u>
	<u>Pink clay</u>	<u>10</u>	<u>1780</u>
	<u>white sand</u>		<u>1974</u>

Information upon completion of well:

- (1) Diameter 8 inches.
- (2) Total Depth 1974 feet.
- (3) Water Level 110 feet below top of ground.
- (4) Cased to 1930, Size 8" x 4"
- (5) Screen: Size 4, Length 40
- (6) Were any formations sealed against pollution?
 yes, no.

If YES depth of formation Top 520' 8"
Why Casing cemented in
Drillers Remarks: None
40' 4" Howard Smith
Stainless Steel Screen

Well Pumped 150 G.P.M. open Discharge (Use. Back Side)

Well No.

①

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be clearly documented and supported by appropriate evidence. This ensures transparency and accountability in the financial process.

In the second section, the author outlines the various methods used to collect and analyze data. These methods include direct observation, interviews, and the use of specialized software tools. Each method is described in detail, highlighting its strengths and potential limitations.

The third section focuses on the results of the data analysis. It presents a series of findings that indicate a significant correlation between the variables being studied. These results are supported by statistical data and are presented in a clear, concise manner.

Finally, the document concludes with a series of recommendations based on the findings. These recommendations are designed to improve the efficiency and accuracy of the processes being studied. The author suggests that these changes should be implemented as soon as possible to achieve the best possible outcomes.
