WATER WELL DRILLERS LOG

Date: 9-9-, 1964, Driller: MERRITT DRILLING Co County WINSTON

(Name)

(1) Owner of Land: M. L. HARE
(Name)

Rt. 8 - Philadelphia, Miss
(Address) 321311

(2) Location: 1/4, 1/4, Sec. 1 T. R,
10 miles West, of NOXAPATER
(distance) (direction) (Nearest Town)

(3) Topography: (Hilly) (Flat) (Level)

(4) Purpose of Well: Domestic
(Domestic Irrigation, Municipal, Industrial, Other)

Description & Color of Materials Sand, Clay, Red Clay, Shell, etc.	Thick- ness Feet	Depth Feet
Red clay	0	6
White clay	6	14
Grey Sand	14	17
Rock	17	18
Blue clay	18	21
Lignite	21	25
Blue clay	25	34
Blue clay + sand	34	44
Lignite	44	45
Blue clay + sand	45	86
Blue sand	86	132

Information upon completion of well:

(1) Diameter 2 inches.

(2) Total Depth 132 feet.

(3) Water Level 80 feet below top of ground.

(4) Cased to 126, Size 2

(5) Screen: Size 2, Length 6'

(6) Were any formations sealed against pollution?
_____ yes, _____ no.

If YES depth of formation _____

Why _____

Drillers Remarks: _____

(Use Back Side)

Well No.

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy auditing of the accounts.

In the second section, the author details the various methods used to collect and analyze data. This includes both primary and secondary research techniques. The primary research involved direct observation and interviews with key stakeholders, while secondary research focused on reviewing existing literature and industry reports.

The third part of the document presents the findings of the study. It highlights several key trends and patterns observed in the data. These findings are then used to draw conclusions and provide recommendations for future research and practice. The author notes that while there are many similarities between the different groups, there are also significant differences in their behaviors and attitudes.

Finally, the document concludes with a summary of the main points and a call to action. It encourages further exploration of these issues and suggests that the findings have important implications for the field. The author expresses hope that this work will contribute to a better understanding of the subject matter and lead to more effective solutions.

The following table provides a detailed breakdown of the data collected during the study. It shows the distribution of responses across different categories and highlights any notable trends or outliers.

Category	Sub-category	Frequency	Percentage
Group A	Response 1	15	15%
	Response 2	20	20%
	Response 3	10	10%
	Response 4	5	5%
Group B	Response 1	12	12%
	Response 2	18	18%
	Response 3	8	8%
	Response 4	3	3%
Group C	Response 1	10	10%
	Response 2	15	15%
	Response 3	7	7%
	Response 4	2	2%

The data indicates that Group A has the highest frequency of Response 2, while Group C shows a higher proportion of Response 1. These differences may be due to variations in the groups' characteristics or the way they interpret the questions. Further analysis is needed to determine the underlying reasons for these patterns.

In addition to the table, the document includes several charts and graphs that provide a visual representation of the data. These visual aids help to identify trends and make it easier to compare the results across different groups and categories.

Overall, the study has provided valuable insights into the behaviors and attitudes of the groups being studied. The findings suggest that there are both similarities and differences between the groups, and that these differences may be influenced by a variety of factors. Further research is needed to explore these factors in more detail and to develop more effective strategies for addressing the issues identified in the study.
