**Notes:**
- The table above details information about a well, including its source of data, depth to water level, and aquifer characteristics.
- Each column represents a specific aspect of the well information, such as the date of the well or its aquifer details.

**Legend:**
- **Well No.** identifies the unique number of the well.
- **Date of Well** indicates when the well was completed.
- **Source of Data** specifies the source or origin of the well information.
- **Depth to** denotes the depth of the well from the surface.
- **Water Level** notes the water level within the well.
- **Aquifer Formation Group** categorizes the type of aquifer material.
- **Aquifer Thickness** measures the thickness of the aquifer material.
