---

**Notes:**

- The document appears to be filled out with various details related to the well's characteristics and location. It includes information about the well's geographical position, ownership, usage, data availability, and technical specifications.

- The form contains sections for the well's description, including details about the well's depth, casing, method of drilling, and the type of lift and power used.

- The water quality data section includes measurements for parameters such as iron, sulfate, chloride, hardness, and conductivity, among others.

- The document is part of a larger set of records maintained by the U.S. Geological Survey for water resources monitoring.
