**Notes:**
- The card contains various hydrogeologic data fields, including physiographic province, drainage basin, subbasin, topo of well site, lithology, origin, thickness, length of well open to, depth to top of, interval screened, depth to consolidated rock, depth to basement, surficial material, coefficient, transmission, and permeability.
- The grid in the middle of the page appears to indicate a cross-section of a well, with the notation "16 x 4."
