

**HYDROGEOLOGIC CARD**

SAME AS ON MASTER CARD

Physiographic Province:                     

03 Section:                     

D Drainage Basin:                     

Subbasin:                     

Topo of well site: (D) depression, stream channel, dunes, flat, hilltop, sink, swamp, (P) offshore, pediment, hillside, terrace, undulating, valley flat

MAJOR AQUIFER:

system                     

series                     

aquifer, formation, group                     

Lithology:                     

Origin:                     

Aquifer Thickness: 147 ft

Length of well open to:                      ft

Depth to top of: 358 ft

MINOR AQUIFER:

system                     

series                     

aquifer, formation, group                     

Lithology:                     

Origin:                     

Aquifer Thickness:                      ft

Length of well open to:                      ft

Depth to top of:                      ft

Intervals Screened:                     

Depth to consolidated rock:                      ft

Source of data:                     

Depth to basement:                      ft

Source of data:                     

Surficial material:                     

Infiltration characteristics:                     

Coefficient Trans:                      gpd/ft

Coefficient Storage:                     

Coefficient Perm:                      gpd/ft<sup>2</sup>

Spec cap:                     

gpm/ft; Number of geologic cards:                     

Well No.                     

E 71
