### Notes
- The page contains a hydrogeologic card with various fields filled in with specific geological data.
- The card includes information about the well, drainage basin, section, subbasin, physiographic province, topography, well site, and aquifer properties.
- Specific depth measurements and lithological descriptions are provided for both major and minor aquifers.
- Intervals screened and depth to basement data are also recorded.
- The permeability, material characteristics, storage coefficient, and specific capacity are listed with corresponding values.
- The page contains additional comments and notes that are not fully legible.
